

Izabela M. Tolentino – Technical Game Designer

izabela.tolentino@gmail.com | California, USA | <http://izabela-tolentino.github.io/> | www.linkedin.com/in/izatonlen

EXPERIENCE

Bungie

August 2021 - July 2026

Technical Designer

June 2023 - July 2026

Associate Designer

August 2021 - May 2023

- Shipped 4 expansions and 11 major updates for *Destiny 2*, a live-service FPS multiplayer looter shooter
- Designed, implemented, scripted, iterated on, polished, and had technical ownership over 7 PvP game modes (ranging from casual party and event modes to a competitive mode used in ranked play) using:
 - proprietary engine (Tiger engine) & scripting language (Bungiescript - Lua)
 - knowledge of competitive player experiences and multiplayer map level design
 - regular playtest feedback and collaboration across different disciplines including other designers, test, world art, sandbox, engineering, cinematics, audio, vfx
- Developed modifier system extending existing mode script architecture to improve modularity in PvP scripts:
 - enabled more flexibility and faster PvP mode development
 - added more private match modifier options for players to choose from
- Provided technical design support for 10 PvP maps (both new and ported) and general upkeep across 30+ maps
- Regularly tuned, upkept, and fixed live bugs across evergreen PvP and PvE activities and systems (matchmaking, objectives, playlists) based on scope, constraints, live data, player sentiment, design goals, and internal feedback
- Created and maintained design & technical documents for effective communication across different audiences
- Engaged in playtesting, providing feedback and logging bugs as needed

RELEVANT PERSONAL PROJECTS

Project Stealth

December 2020 - August 2021, July 2026 - Present

Game Designer

- Prototyped stealth mechanics in Unreal (C++) and Unity (C#) using vector math / linear algebra in a 3D space
 - Currently developing project in Unreal Engine 5 in both Blueprints and C++
- Designed core game features with a focus on partner stealth, story, and discovery
- Writing and revising game's story and narrative elements

hoaXcape duet (FPS Combat Prototype)

February 2021 – May 2021

Game Designer (Developed under a Ubisoft mentorship program)

- Rapidly prototyped various combat abilities with distinct progression stages to implicitly tell game narrative
- Wrote C# scripts for various combat mechanics in Unity (ability system, stackable combos, etc.) using skills in vector math / linear algebra in a 3D space and object-oriented programming
- Iterated on prototype and made adjustments based on design mentor feedback

SKILLS

Design: Competitive Multiplayer, Gameplay, Systems, Technical, Rapid Prototyping, Cross-Discipline Collaboration

Software: Unreal Engine, Unity, Blender, Adobe Photoshop, Autodesk Maya, Tiger Engine (Bungie: Destiny 2)

Languages: C++, Blueprints (Unreal Engine), C#, Lua, C, Python

Tools: Jira, Perforce, Git, Visual Studio

EDUCATIONAL BACKGROUND

University of California, San Diego (UCSD)

B.S. in Mathematics-Computer Science

Graduated June 2020
